Nekonium Community  
Japan & Earth  
Solar System, the Milky Way

Illustrated by Jiluko(汁粒)

## Overview

Nekonium is a blockchain based on ETH source code, originally created by Japanese team for experiment of smart contracts & blockchain. After development & testing phase (around 1 year), the blockchain will go on its own way: community driven through petition & voting. It will fully inherit smart contract technology in Ethereum and will target the community in Japan with more Dapps, and Webapps.

## Goals

1. Be famous in Japan => Earth => the Universe through branding art, illustrations, music, souvenirs, gifts and a friendly community :)
2. Community driven blockchain. All developments will be proposed by NUKO holders & cherished/implemented by community developers
3. To be decided through voting + petition

## Milestones

### I. Nekonium blockchain created

July 2017

### II. Development progress

**Done:**

- Remix + Gnekonium + Mist port & update
- PR campaign in Comiket event
- Bounty lists
- Reform the organization (in progress)
- Android wallet ([GooglePlay Link](#))
- Development of basic tools (blockexplorer, nukobot, richlist, twitter faucet)

**Planning:**

- Atomic swap with 1 ERC20 Token on Ethereum, enable cross-chain application
- Twitter tipbot
- iOS app
- ENS (mapping nuko address to readable name)
- Crypto kitties JP version
- Voting app (community members vote on admin & team proposal)
- Petition app (anyone can post idea + suggestion, the ones got most votes will be implemented)
- .... To be decided by nuko holders' votes.

**Planning Further:**

- Hard fork/soft fork decision based on community voting (at least 1 year after launch)

### III. Community's marketing effort

- Comiket airdrop campaign
- Listed on Stocks.Exchange (November 2017), Coinmarketcap (December 2017), Coingecko, cryptofolio.me, etc,... (@cs on Discord is the core member of the marketing team)
- To be continued...
